

WYMIAR PO MONTAŻU

WYMIAR TECHNICZNY

A classic brown wall panel is the most fashionable interior accessory that will change any interior, providing a spacious effect on the wall. The panel is made of PolyForce material, which ensures full water resistance, so it can be installed in humid rooms such as the kitchen. The lamella has been extremely hardened thanks to the innovative ScratchShield production technology, thus ensuring resistance against damage. The special design of the Lamelli is 270 cm long, which allows it to be installed in one piece, without worrying about the aesthetic connection of subsequent panel elements.

Easy, quick and clean installation using **Mardom FixPro** or **Mardom Max adhesive**.

Possibility to finish panels with dedicated ends - **left** and **right**.

The product is entirely made in Poland.

Length: 270 cm

Width: 12 cm

Depth: 1.2 cm
