

## WYMIAR PO MONTAŻU

## WYMIAR TECHNICZNY

A deep brown wall panel that will become a unique decoration, giving a spacious effect on the wall. The panel is made of waterproof PolyForce material, so it can be successfully used in rooms exposed to moisture, such as a kitchen or bathroom. Lamelli was made in the ScratchShield technology, which strengthens the surface of the material, thus ensuring excellent durability. The length of 270 cm ensures an aesthetic and easy installation in one piece, thanks to which there is no problem of unsightly joints between the individual elements of the wall panels.

Easy, quick and clean installation using **Mardom FixPro** or **Mardom Max adhesive**.

Possibility to finish panels with dedicated ends - **left** and **right**.

The product is entirely made in Poland.

Length: 270 cm

Width: 12 cm

Depth: 1.2 cm
